INFORMATION & ASSISTANCE

HANDBOOK

The Area Agency on Aging of the
City and County of Honolulu Since 1973

www.ElderlyAffairs.com

Published as a public service by the City and County of Honolulu
Mayor Rick Blangiardi

HOW TO USE THIS BOOK

-  To locate services, use the Table of Contents or the Index. For additional listings of companies, check the Yellow Pages of the Telephone Directory under similar headings, or search online.
-  TTY refers to a phone number that is connected to a device often used by individuals who are deaf or hard-of-hearing.
-  If an agency is listed more than once, its address may appear only in the first entry.
-  Inclusion of an agency in this handbook does not imply endorsement, nor is exclusion a reflection on the value or quality of an agency's services.
-  This handbook can also be found on our website:
www.elderlyaffairs.com
-  For more information, call the Elderly Affairs Division Senior Helpline at 808-768-7700.

SENIOR INFORMATION & ASSISTANCE HANDBOOK

Elderly
Affairs
Division
A G E S M A R T

A publication of the
Elderly Affairs Division
Department of Community Services
City and County of Honolulu

MESSAGE FROM MAYOR RICK BLANGIARDI

Aloha,

Together with Department of Community Services, Elderly Affairs Division, we take great pleasure in presenting the updated **Senior Information and Assistance Handbook**. This handbook is a key resource for our Kupuna, their families and caregivers to assure our elders are comfortable, healthy and have safe living environments as they age in place.

The Senior Information Guide provides valuable information on senior housing options, meal assistance, transportation, community services and much more. Family and caregivers can also find resources to adult day care, in home care, safety and fall prevention and also support group classes.

Please use and share the Senior Information Guide with your loved ones, friends and neighbors. For more information, please visit www.elderlyaffairs.com or call our Senior Helpline at 808-768-7700.

A handwritten signature in black ink that reads "Rick Blangiardi". The signature is written in a cursive, flowing style.

Elderly Affairs Division

A G E S M A R T

**Department of Community Services
City and County of Honolulu
925 Dillingham Boulevard, Suite 200
Honolulu, Hawaii 96817
Elderly Affairs Helpline: 808-768-7700
www.elderlyaffairs.com**

The Elderly Affairs Division (EAD) has been the designated **Area Agency on Aging** for Oahu since 1973. Created by the **Older Americans Act of 1965**, it is one of 600 Area Agencies on Aging nationwide. Its mission is to develop a comprehensive and coordinated system of services to assist older persons in leading independent, meaningful, and dignified lives in their own homes and communities for as long as possible.

The Division coordinates advocacy efforts on behalf of elders, encourages partnerships to improve and expand services, and contracts with agencies to provide services to seniors and caregivers. The types of services contracted include:

- Case Management
- Personal Care
- Homemaker and Attendant Care
- Home Delivered and Congregate Meals
- Housing Information and Assistance

- Legal Information and Assistance
- Transportation
- Caregiver Respite, Support, and Education
- Health Promotion
- Senior Centers

The **Elderly Affairs Division** also has an **Information and Assistance Unit** which offers the following:

- Elderly Affairs Helpline (808-768-7700)
- Telephone consultation, information, and referral to services
- Assessments of frail and homebound elders
- Speakers, event exhibits, publications, website
- Volunteer opportunities for active seniors (RSVP Program)

With advances in health care and increasing disparity of lifestyles, the frail and the elderly have evolved into a diverse group. Many people in their 50s are now acquiring chronic conditions that require ongoing assistance. Some in their 80s and 90s may still be physically independent, but suffer from dementia or social isolation. Older persons of today now span several generations, each with their own sub-cultures and values. Mixed in with Hawaii's ethnic and cultural diversity, the wide range of complex issues arising are a growing challenge for our **Ageing Network**.

The Ageing Network are the groups, agencies, and providers that serve and advocate for the elderly. Now, more than ever, is their collaboration and innovation needed. **Ageing affects all ages**, and the more each of us understand the aging process, the better we can respond to assist our Kupuna. Having proper knowledge and being prepared can improve quality of life or even prevent a crisis or costly intervention.

Whether you are a grandchild tasked to watch your grandparents, a working adult that takes time off for your parents' medical appointments, a supermarket cashier that frequently assists seniors, or a young college student living next door to retirees, **all of us could benefit from knowing more**. Being able to redirect outbursts and calm an elder with dementia, recognizing the signs of isolation, mental illness, and financial exploitation, knowing what questions to ask when hospitalized, where to go for counseling or a support group, how to make your own Advance Directive, or just knowing who to refer to can make all the difference in the world to **your** family member, neighbor, spouse, or **even you**.

Basic Needs – Housing

Most older adults prefer to age in-place and many continue to live in their own homes with added support (see **Family Support**, page 25). Others may choose or find it necessary to live with others or an alternative residence for support, convenience, and/or socialization.

Housing options for the elderly vary greatly. For independent seniors, there are retirement residences and low-income or affordable senior apartments. These units have minimum age restrictions which typically range from 55 for retirement residences to 62 for low-income senior rentals.

For those who need help with activities of daily living, options include getting **In Home Assistance** (page 37) or residing in an Adult Residential Care Home (ARCH) or Assisted Living Residence. For those with greater needs, options include Skilled Nursing and Intermediate Care Facilities (nursing homes), Expanded ARCHs, or Foster Family Care Homes.

Home Improvement

Home modifications such as walk-in showers, grab bars, enhanced lighting and lever door handles may allow a person who is increasingly frail to remain in their home independently. When working with building or remodeling professionals, ask about “Universal Design” options. For more information, search for “Universal Design” online or at your library.

Housing Search & Information

Start your search early as wait lists for low-income senior housing are extremely long, especially in urban Honolulu. Go to www.elderlyaffairs.com for additional housing information. Please note the Section 8 programs with the State Housing Authority and the City and County of Honolulu are currently not accepting applications due to an extensive waitlist and limited funding.

Residential Care Homes & Adult Foster Homes

Adult Residential Care Homes (ARCH), Expanded ARCH (ExpARCH), and Community Care Foster Family Homes (CCFFH) provide shelter, supervision, and care for persons needing help with activities of daily living.

These homes are regulated by the State Department of Health **Office of Health Care Assurance**. There are over 1000 ARCHs, ExpARCHs, and CCFFHs on Oahu. Most are private homes in residential communities certified to

care for just a few persons. A few are large facilities with many residents. Some offer specialized care, such as for persons with dementia. Costs vary greatly depending on location, amenities, and the amount of care provided.

ARCHs, ExpARCHs, & Adult Foster Homes...

What's the difference?

An ARCH provides 24 hour supervision and assist residents with daily living tasks such as meal preparation, toileting, and bathing. An ExpARCH is an ARCH that has additional certification to provide a higher level of care, known as **Intermediate Care Facility (ICF)** level of care.

Adult Foster Care Homes, also known as **Community Care Foster Family Homes (CCFFH)** only offers ICF Level care and were previously regulated by the Hawaii Department of Human Services. CCFFHs were created as a community-based alternative to traditional Nursing Homes specifically for Medicaid clients. However, ExpARCHs eventually were also allowed to accept Medicaid-covered residents and CCFFHs now have the option to accept some private-pay residents. Placement for ICF level residents must be done through a specialized case management agency licensed by the **Office of Healthcare Assurance**.

What are the advantages and disadvantages?

Costs for a care home are much more affordable than 24 hour care provided in your own home or in a traditional Skilled Nursing Home. For ICF-level patients, they provide an option to remain in a home environment rather than a larger institutional setting.

However, Nursing Homes will have more skilled staff available at any given time because of the larger resident population. Meals are also more regulated for specific diets, and there are usually more options for activities available to the residents.

When considering any one of these homes, it is a good idea to talk to the caregivers and residents, observe the condition of the physical and social environment, and inquire about the visiting hours. You may want to discuss the expectations of the caregiver to provide transportation, meals, and personal care, if needed. Also request to view the most recent survey/inspection findings done by the Department of Health. If you have concerns about a care home, consult with the **Long Term Care Ombudsman** at 808-586-0100.

Lists of licensed ARCHs, ExpARCHs, CCFFHs, and CCFFH case management agencies are on the **Office of Healthcare Assurance** website: health.hawaii.gov/ohca/state-licensing-section.

Retirement & Assisted Living Residences

Retirement residences are for independent seniors, normally 55 and older, that have amenities such as housekeeping, on-site dining and meals, and transportation coordination. Assisted Living residences add the component of intermittent personal care. Some facilities also offer special dementia units and several have skilled nursing facilities on site.

Most of these residences are month to month rentals. In addition to monthly charges, 15 Craigside and Arcadia require entrance fees that guarantees lifetime care in their facilities. Kahala Nui requires a partially refundable deposit in addition to their monthly fees.

Units in some residences such as **Olaloa Retirement Community** and **One Kalakaua Senior Living** are bought and sold by individuals. Contact a realtor for assistance in purchasing or renting these units.

drive safely & independently, with or without the need for adaptive equipment.

Local Transportation & Passes

Some services are for persons who are elderly or disabled that can travel
alone; others are for persons who need to be accompanied. Applications for
Persons with Disabilities Parking Permits are available at any Satellite City
Hall (page 21) or download form from www.hawaii.gov/health/dcab. If you have a
smart phone, consider using ride share such as Lyft and Uber.

The following providers offer non-emergency curb-to-curb service. **Curb-to-curb service** is pick-up and drop-off only. Some may also offer door-to-door,
escort, or other services. **Door-to-door service** includes assistance between
the vehicle to the building entrance, usually for passengers who are frail or use a
wheelchair. Some medical transportation providers also accommodate gurneys
and stretchers and may accept Medicaid for qualified medical appointments;
these services are also non-emergency transportation only.

Family Support

The following are providers that promote quality of life by supplementing the care for frail elders that is generally provided by friends & families. If you help a friend or family member who needs assistance with things like transportation to the doctor, grocery shopping, or help with personal care and grooming, then you are a **Family Caregiver**. It is a common belief that only paid and professionally trained people are caregivers. However, informal & unpaid support from family caregivers consist of a significant portion of all the long-term care services provided in the community.

Family caregivers often don't think of getting help until they burn out or until a crisis occurs. Many do not have sufficient skills and/or understand the legal and financial implications of being a caregiver to an elder. Support groups,

counseling, classes, and workshops can help them to better understand their situation, learn appropriate skills, reduce stress, and maintain their health so that they may continue their important role.

People often think of nursing homes when they hear someone needs **long-term care (LTC)**. However, LTC includes any type of ongoing service a care recipient would need to maintain quality of life, including assistance provided in the home by Family Caregivers or other agencies.

Medical insurance (such as Medicare) normally only covers a limited amount of skilled nursing care for the purpose of **rehabilitating the health of a patient (to help them get better)**. If the care an elder needs is related to a **chronic condition that is not expected to improve**, then the elder may be considered to need LTC. The prognosis of diagnosed medical conditions is key to understanding if rehab, LTC, or hospice care would be most appropriate.

Case Management

Most case managers specialize in providing **specific assistance in certain situations**, such as those facing homelessness or planning hospital discharges. They may work for agencies that **serve only a certain demographic**, such as frail elders, at-risk youth, or those with developmental disabilities. Or they may only provide a specific task, such as in-home care coordination or facility placement. Case managers that help with coordinating care for frail or disabled elderly persons develop care plans based on individual needs. They may also assist with service delivery, finding resources, and/or monitoring progress.

Some mistakenly believe Case Managers are supposed to help clients with any problem they may have or provide for all client requests. Others may expect them to make decisions for clients, or force clients to do what is appropriate. On the contrary, case managers will have a dialogue with clients to help empower them, set goals to improve their situation, and follow a plan that is achievable. This includes explaining options and the benefits and consequences of each.

The goals are often what the client wants, with the plan encompassing the difficult decisions and effort to reach them. If a client is not dedicated to the plan, goals are often not achieved. It may not be apparent when a client agrees to parts of the plan that may be difficult for them. When clients understand the purpose of their case manager and are honest about their abilities and preferences, they are more likely to succeed in reaching their goals.

Not all case managers are Social Workers. Some may have medical or other social service backgrounds. For placement into Community Care Foster Family Homes (CCFFH) for individuals requiring Intermediate Care Facility (ICF) levels of care, contact a Community Case Management Agencies (CCMA). Refer to **Residential Care Homes & Foster Homes** on page 14 for more information.

Respite – Adult Day Care & Day Health

These programs provide day-time respite in a communal environment for an elder that needs supervision. This service is ideal for a caregiver who may work during the day. Activities, amenities, meals, on-site services, and hours of operation vary greatly. A few also offer half-day, weekend, and/or holiday service. Typical prices range from \$50-100/day which is a much more affordable option when compared to in-home care on an hourly basis.

Adult Day Care (ADC) programs include supervision, recreation, socialization, exercise, meals, and group activities. ADC providers are licensed by the Department of Health, **Office of Health Care Assurance, State Licensing Section**. Most centers require participants to be 55 years or older, ambulatory, continent, a non-wanderer, non-combative, able to eat independently, and transfer with little or no assistance. Some provide additional assistance or special services, such as assisting with personal care or specialized dementia care, usually for an added cost.

Adult Day Health (ADH) programs offer similar services as ADC but are certified to care for those who require a higher level of care, up to intermediate care facility (ICF) level. Additional services under this higher level could include health assessments, administration of medication, or care coordination. There

may also be specialized care that cannot be provided normally under ADC. ADH providers are staffed with Registered Nurses who are qualified to dispense medication and provide skilled nursing level care. ADH Centers are licensed and regulated by the Department of Health, **Office of Health Care Assurance, Medicare Section.**

ADC and ADH providers require 2-step TB testing and medical clearance (physical exam) to participate. Most have a nominal application or assessment fee, require pre-payment that may be non-refundable for missed days, and have a minimal attendance to stay enrolled, usually at least 2 days/week. Some providers will suggest a trial period if there is concern that the applicant may not be appropriate for their program.

For the most updated list of ADC and ADH providers, go online to the **Office of Healthcare Assurance** website: health.hawaii.gov/ohca

End of Life Services

The following programs address end of life issues. Also see **Kokua Mau**, a partnership of agencies and organizations for improving care at the end of life at www.kokuamau.org.

Advance Directives, POLST, CCO & DNR

Formerly known as “Living Wills.” You can let your family and physician know what kind of treatment you want in the event you cannot speak for yourself. You can also designate someone to make decisions for you if you become incapacitated. Forms may be obtained from most hospitals, healthcare organizations, attorneys’ offices or from UHELP.

Other documents, including **Physician’s Orders for Life-Sustaining Treatment (POLST)** and **Comfort Care Only/Do Not Resuscitate (CCO- DNR)** I.D. bracelets, give instructions to health care personnel in emergencies. Forms may be obtained online at www.kokuamau.org.

In Home Assistance

Older adults are often reluctant to accept in-home assistance. They may not want strangers in their home, deny the need, or fear that admitting they need help means the next step is being placed in a nursing home. On the contrary, this assistance may actually delay or avoid institutionalization, allowing them to remain at home longer.

Assistance in the home comes in various forms. Traditionally, most care is provided by relatives, friends, and neighbors. However, this informal care sometimes may need supplementing. Formal assistance is provided by non-profit organizations, privately hired independent providers (nurses, therapists, aides, homemakers, and companions), home care agencies, home health agencies, and government-sponsored programs. Home health agencies provide more medically oriented services than home care agencies. As with all services, it would be wise to check qualifications and references, especially if hiring independent providers.

Medicare covers only certain in-home services for a limited period of time; it does not provide long-term care. When hospitalized, talk to the doctor and ask to speak to the social worker or discharge planner to identify the family's realistic role in caring for the patient at home with the services available.

Medicaid clients should contact their **QUEST Integrated (QI)** plan provider to see if they are eligible for service covered under their plan. For more information and referrals for assistance in the home, call the Senior Helpline at 808-768-7700.

Chore/Homemaker Services

May include housekeeping, shopping, and errands.

Adult Intake Unit

808-748-7994

Serving seniors island-wide. www.palolohome.org

Home Care & Home Health Agencies

Home Health Agencies are organizations which provide skilled nursing services and other therapeutic services ordered by a physician to homebound patients. A home health agency can be Medicare-certified which means that they can provide services that are covered by Medicare. Medicare-certification is voluntary. State licensing of home health agencies by the Office of Healthcare Assurance is required.

Home Care Agencies provide custodial care services which are non-medical such as housekeeping, meal preparation, and ongoing assistance with personal care. The Department of Health is currently in the process of licensing Home Care Agencies. Home Care Agency services are not covered by regular Medicare plans; services are private pay. To check the license status of a Home Care Agency, go to: health.hawaii.gov/ohca/state-licensing-section/hcal/agencies/.

Home Health Agencies may only provide Medicare-ordered services (doctor ordered, usually for short-term after hospitalization), private-duty services (private-pay, usually for long-term), or both. **Home Care Agencies** are private-pay services, however, some also work with **QUEST Integrated** plans. For private-duty services, most agencies have a 2-4 hour minimum per visit and the care recipient must receive on-going services, typically a minimum of once or twice a week. Some offer temporary respite, live-in care, and/or travel assistance/escort. The lowest level of care typically starts at \$18-24 an hour and includes services such as companionship, housekeeping, and light meal preparation provided by staff often referred to as “**companion aides**” or “**home helpers**.” Rates are higher when hands-on services such as help with transferring, bathing,

and toileting are provided. These specially trained staff, may be referred to as “**personal care assistants**,” “**home health aides**” or **Certified Nursing Assistants (CNA)**. Skilled care requiring **Licensed Practical Nurses (LPN)** or **Registered Nurses (RN)** can cost \$35-60 an hour or more. If your loved one could benefit from a social setting, also consider **Adult Day Care and Day Health** (page 29) which is a much more affordable option.

When searching for any service that brings workers in your home, make sure to inquire what kind of safeguards they have established to prevent adverse events. This would include things like insurance, bonding, background checks, accreditations, and certifications. It is highly recommended to put away and secure ALL valuables before services begin to prevent any unfounded misunderstandings or accusations, especially if the care-recipient has a cognitive impairment.

Listed below are licensed **Home Health Agencies** on Oahu. For a complete list of licensed Home Health Agencies statewide, go to the **Office of Health Care Assurance** website at: health.hawaii.gov/ohca. For reviews of Medicare certified Home Health Agencies, go to: www.medicare.gov.

Health Care

**Home Modification and Fall Prevention Tips
for Kupuna & Caregivers**

Information provided by Occupational Therapists Catia Garell, MA, OTR, SCEM of Thrive for Life, LLC and Kendall Horan OTS, OTR, BS, ECHM in support of Age-Friendly Honolulu www.agefriendlyhonolulu.com

No matter what your age, everyone is at risk of falling. However, older persons are more likely to be severely injured from a fall. Falls among older adults are the leading cause of fatal and nonfatal injuries. Each year, one out of three

older adults falls, resulting in emergency room visits and hospitalizations. Most kupuna prefer to live independently in their own home and in the community for as long as possible. Given the costly impact of falls, it is critical to have a safe home environment in order to age-in-place. Below, you will find valuable home modification and fall prevention tips for kupuna and family caregivers.

Remember Your Telehealth/In-person Physical Exams:

Telehealth or video calls can be requested to connect you with your primary care provider (PCP) from the comfort of your own home. During a telehealth or in-person physical exam, let your PCP know you are concerned about falls and ask about the following fall prevention strategies.

Health Maintenance and Exercise is Important

- If you have had a fall, or a “near fall,” or are concerned about falling, discuss this with your PCP. Consider requesting your PCP to generate a referral to a Physical and/or Occupational Therapist to further identify and address your fall risk.
- Start a regular exercise routine
- Try Tai Chi, research has shown that it is effective in preventing falls in older adults
- Check with your insurance plan to see if a free gym membership is included

See Clearly to Prevent Falls

- Schedule a annual visit with your eye doctor
- Light bulbs: Increase wattage (3,000-4,000 Kelvin) and change to energy efficient LED light bulbs
- Use natural lighting from windows
- Increase light sources in your kitchen, hallways, bathrooms, bedrooms, as well as at the top and bottom of your stairs
- Install a pathway of motion centered lights for night time bathroom visits
- Install lighting for activities that require more attention such as reading, cutting foods, or writing
- Place dark furniture against light walls
- Replace white light switches with darker color switch cases or create a border using dark colored tape
- Change colors for different surface levels

Manage Your Medications to Prevent Falls

- Schedule a visit with your pharmacist to review current medications, vitamins, and supplements
- Use a pill box or an organized schedule to make sure you keep track of the medications you are taking
- Trouble opening your medication bottles? Ask the pharmacist to load medication in an electric pill box dispenser
- Confirm with your PCP how much daily hydration and output is appropriate for you

Small Changes to Make Your Home Safer

- Contact a knowledgeable rehabilitation professional such as an Occupational or Physical Therapist for a home assessment
 - In addition, there are other professionals that are knowledgeable in the principles of aging-in-place such as a: Certified Aging in Place specialist or Certified Living in Place Professional
- Pick up items off the floor, stairs, and any high use areas to reduce clutter
- Place frequently used items in areas that are easy to reach
- Move heavy items to lower shelves
- Remove throw rugs
- To reduce your risk for heat exhaustion have your air conditioner inspected regularly
- Be aware of fluid intake as this leads to dehydration that increases the risk of falling
- Install lever style door handles, D-shape/C-shape cabinet handles, and rocker style light switches for ease of use
- Are your floors slippery? Apply a layer of anti-slip flooring and/or non-skid tape
- Install interior and exterior motion sensed lighting
- Install handrails at all staircases and steps

Changes for a Safer Bathroom

- Install a handheld shower hose on a vertical glide bar that is a grab bar
- Discuss with your health care provider the appropriate location for grab bars to support your safety. Use a licensed contractor to install grab bars
- Discuss with your health care provider what type of seating system is safe for you to use in the shower
- Increase lighting throughout the bathroom especially at the toilet and the shower

- Apply a layer of anti-slip flooring and/or non-skid tape in high use; wet areas
- Position shampoo and soap in a safe and reachable area

Caregivers Can Help to Prevent Falls

- Communicate with your client/loved ones' medical team regularly regarding your concern for falls, fear of falling, "near falls", or recent falls
- Request a referral to a rehabilitation professional like a Physical or Occupational therapist to reduce their risk for falls
- Discuss with your client/loved ones pharmacist about all medication and supplements
- Discuss the above fall prevention tips with your client/loved one

Tips for Working with Home Modification Professionals

- To reduce your risk for falls, prior to hiring a contractor, consider contacting a knowledgeable rehabilitation professional (Occupational or Physical Therapist)
- Prior to hiring or discussing your needs with a contractor call this number to confirm their license: (808)-587-4272 or visit www.businesscheck.hawaii.gov
- Problems with a contractor? Contact Regulated Industries Complaints Office (RICO) at (808)-586-2666
- Verify an Occupational Therapy or Physical Therapy License: (808)-586-3000 or <https://pvl.ehawaii.gov/pvlsearch>
- Do I need a Permit? Call Honolulu Department of Permitting and Planning (808)-768-8220 or visit: www.honoluluodpp.org
- Want to know your rights as a renter? Legal Aid Society of Hawai'i (808)-536-4302 Senior Intake Hotline at Legal Aid: (808)-536-0011 or visit <https://www.fairhousinghawaii.org/>

Health & Safety Education

One out of three older adults falls each year. Falls are the most common cause of injuries that can make it difficult to get around and limit independent living. The risk can be reduced by exercise that increases strength and improves balance, medication review to reduce side effects and interactions, eye checks once a year, improved home lighting, and reduction of hazards in the home that can lead to falls. Tips on falling and other health related topics can be found at the U.S. National Library of Medicine’s MedlinePlus at www.medlineplus.gov.

Also see **Exercise for Frail Seniors** (page 28), **Support Groups** (page 34), **Education** (page 24), and **Caregiver Education** (page 26).

Hospital Discharge Information

What you should know when leaving the hospital:

A patient is discharged when a physician has determined his condition has stabilized and no longer needs hospital-level care. ***It does not necessarily mean the patient has fully recovered.*** This time can be especially stressful because of the urgency and high level of care required by the patient.

Ask Questions!

It is important to consult with doctors, nurses and social workers on a discharge plan ***while the patient is still in the hospital.*** Family members may be assigned tasks such as changing wound dressings, dispensing medications, and/or transferring the patient in the home while he or she is recovering. Those responsible must understand their role and make it clear to the discharge staff if they feel they need assistance or cannot adequately perform the tasks.

Some Questions you may want to ask:

- Who is in charge of the patient's discharge from the hospital?
- How long will it take for the patient to recover?
- What tasks will someone need to do for the patient?
- Do the tasks require special training?
- Who will provide the training?
- Who can help if family support is inadequate?
- Does the patient need to take any medications?
- How many and how often does the patient need to take them?

- Does the patient need medical equipment?
- Where will it come from?

Learn all the options...

If there are no friends or family who can adequately assist, other in-home services may be needed. Ask if the patient’s condition makes him or her eligible for in-home care covered under insurance. In some cases, the hospital physician can order these services before discharge. Also consider other options, such as private-pay services. See page 38 for **In-Home Assistance**. If you only need help during the day, consider **Adult Day Care & Day Health**, page 30.

Care Facility Placement?

If the patient needs long-term care that cannot be provided at home, ask the discharge planner for assistance with placement into a care facility such as a care home, adult foster home, or nursing home. **Consider this option before the patient’s discharge plan is finalized.** See pages 12-14 for information on **Nursing Homes, Care Homes, and Adult Foster Homes**.

Many organizations provide information on what you should expect during hospital discharge and the questions you should ask. Search “**Hospital Discharge**” online for more information.

Medical & Dental Clinics

For list of **Geriatricians** (doctors that specialize in older adults) see the Family Caregiving Guide online at www.elderlyaffairs.com. Also ask your health insurance provider or primary care provider for referrals.

Medicare & Medicaid

Medicare is a federal health insurance plan available to seniors 65 years and older and certain people with disabilities. It does not pay for all medical costs. Beneficiaries are responsible for deductibles, copays, premiums, and non-

covered services. **Medicare does not pay for long-term care**; skilled nursing facility care provided by Medicare is limited to less than 100 days, depending on the beneficiary's condition.

Part A, Hospital coverage, limited skilled nursing facility & home health, and hospice - No premium for those who worked longer than 10 years or covered by a spouse.

Part B, Doctor visits, outpatient, and other medical care.

Part D, Drug coverage – plans and premiums vary.

Part C, also referred to as **Medicare Advantage Plans**, combines Part A and B plans into **PPO (Preferred Provider Organization)**, **HMO (Health Maintenance Organization)**, **PFFS (Private Fee for Service)**, Cost Plans, Special Needs Plans, and Medical Savings Accounts. For a description of the plans available in Hawaii, check your current **Medicare and You Handbook**.

Each of these plans have their own unique advantages and limitations. **Be careful when choosing Part C or D plans as they may affect your other coverages, such as an employer retirement plan.** If you receive medical coverage outside of Medicare, consult with that provider before making any changes to your Medicare coverage.

Medigap plans are Medicare Supplemental Insurance plans provided by insurance companies to fill the “gaps” in coverage that may not be provided by Original Medicare.

Call **Hawaii SHIP (808-586-7299)** if you need help understanding your options and choosing a Medicare plan. It is important to sign up for Medicare as soon as you become eligible, otherwise you may have to pay a penalty or have a gap in coverage if you miss your initial enrollment period.

Medicaid is a State-administered health insurance program for persons with certain disabilities/medical conditions and persons 65 years and older who have very low incomes and limited assets. In Hawaii, the Medicaid program is run by the Department of Human Services Med-QUEST Division. Services are provided through the managed care program **QUEST Integration (QI)**.

Medical Equipment

Medical equipment also known as **durable medical equipment (DME)** includes items such as walkers, wheelchairs, and hospital beds. Medicare will cover certain types of DME with a prescription.

In some cases, renting DME may be more appropriate than purchasing. Renting is also covered under Medicare. Consult with a **Hawaii SHIP (808-586-7299)** counselor to see what would be best for your situation. In most cases, once you purchase DME using your Medicare benefit, you may be responsible for repairs and /or replacement. Be sure to get information in writing on warranty coverage BEFORE purchasing the equipment.

To find a DME supplier go to www.medicare.gov and click on “Find suppliers of medical equipment & supplies.”

Look for dealers that accept “assignment” which means they accept Medicare’s payment amount as payment in full (not including plan copayment). Ask friends, social workers, and medical professionals for advice and referrals. Call Hawaii SHIP for additional information.

Mental Health Care & Counseling

Life changes that happen as we get older may cause feelings of uneasiness, stress, and sadness. For instance, the death of a loved one, moving from work into retirement, or dealing with an illness can leave people feeling sad or anxious - feelings that could develop into depression.

Depression and anxiety are common problems among older adults, but they are not a normal part of aging. These are real diseases that people cannot simply “snap out of.” However, many people do recover when provided proper treatment. This could include psychotherapy, group counseling, and/or medication. Ask your insurance provider or primary care physician for referrals.

Financial Fraud, Exploitation, & Scams

Financial fraud, exploitation, and scams are a growing problem with seniors in Hawaii. Understanding the risks and being able to identify signs of a scam can help protect you and your loved ones from being victimized. Elders with the highest risk are frequently alone or isolated, have memory or mental health issues, and have histories of addictive or risky behavior.

Are you being scammed? Here are some warning signs:

- The perpetrator demands an immediate response, says offer will expire, or tries to threaten or scare you into participating.
- The perpetrator **refuses to give contact information** or send written terms of the opportunity.
- The perpetrator promises an easy reward in exchange for a fee.
- The perpetrator still contacts you after you have requested they stop.

Is an elder you know being exploited? Look for these signs:

- Change in banking habits; frequent withdrawals or large transfers.
- Missing financial statements; no recollection of where statements went.
- Missing valuables, especially those of personal importance to the elder.
- When on social outings, elder often has no cash for minor expenses.
- Frequent purchases of unneeded items or costly gifts.
- Unpaid bills and collection notices.
- Noticable changes after meeting a new “love interest” or “friend.” Includes reduced participation in social activities and changes in moods or habits.
- The new “friend” escorts elder everywhere, speaks on their behalf, and supervises elder’s conversations with others.

What can you do?

- Keep up with current events by watching the news or reading the newspaper. Agencies will issue warnings on new scams to the media.
- Say “NO” to solicitations by phone and mail.
- Be cautious of those who try to befriend you, especially if they are aware of your income, assets, or other valuables.
- Do not fill out contest or prize application forms.
- Never give out your personal information to unknown persons.
- Maintain regular contact with friends and family who are vulnerable and at risk of victimization.
- Report suspected exploitation or abuse to APS.

- Keep a detailed record of frequent suspicious activity.
- File a police report when you know a scam has occurred.

Advocacy & services for people with intellectual or developmental disabilities.

Other Groups

Abuse & Neglect Victims

Abuse can affect people of all ethnic backgrounds and social status. It may include physical, emotional and sexual abuse; neglect; abandonment; and financial exploitation.

Social isolation, mental impairment, or a history of domestic violence may make an older person more susceptible to abuse. Sometimes seniors neglect their own care because of declining health, isolation, dementia, or drug or alcohol dependency.

Financial exploitation is a growing problem. Some people will try to take advantage of vulnerable elders. Perpetrators are often a caregiver, friend, or even a family member. For agencies that deal with scams and fraud see also **Consumer Assistance & Protection**, page 54.

Adult Protective Services

Dept. of Human Services – Adult Intake Unit **808-832-5115**
420 Waiakamilo Rd. Suite 202 Honolulu 96817 www.hawaii.gov/dhs.

Emergency Preparedness

After a disaster such as a hurricane, tsunami, or earthquake, it may be a while before the government can respond. A little planning and preparing on your part could make a big difference when a disaster strikes.

Think about what you would need in different situations and **create a plan**. **Identify who you would contact** and discuss your plan with them. **Designate a meeting place** in case you are unable to contact each other, such as a nearby shelter. **Keep the information on your emergency contacts** in one easily accessible place, such as on a card on your refrigerator or next to your telephone.

Depending on the type of emergency and where you live, you may be advised to stay where you are (shelter in place) rather than evacuate. If you live in an apartment or condo, **make sure you familiarize yourself with any safe zones and/or evacuation plans**.

Look in the phone book for other emergency preparedness information and identify the closest shelters to you. If you have pets, plan accordingly as shelters may have specific requirements.

Making Your Plan:

Identify who could help you:

What they would do for you:

Places near me identified as potential shelters:

Your Emergency Kit

Prepare enough supplies to last 14 days or more. Expect to be without telephone, power, and tap water. You will need **water for drinking, cooking, and hygiene**. At least **1 gallon per person, per day**, is suggested.

- Water, at least 14 gallons per person. Tip: If you receive early warning, fill up pots, large containers, buckets, and/or your bathtub with tap water.
- Food, non-perishable, enough to last 14 days.
- If you have a vehicle, top off your gas tank.

Keep on hand:

- Portable radio with extra batteries.
- Flashlight with extra batteries.
- A whistle, to signal for help.
- Dust mask.
- Candles and matches/lighter.
- Nonperishable food, manual can opener, etc.
- Disposable tableware, utensils, paper towels, plastic bags, etc.
- First aid kit with antiseptic, bandages, etc.

If you need to evacuate, have these items ready to go:

- Medications.
- Sleeping bag, blanket, air mattress, etc.
- Extra clothing, shoes.
- Personal care items such as toothbrush and toothpaste, toilet paper, moist towelettes/wipes, hand sanitizer, soap, etc.
- Assistive devices such as walkers, eyeglasses, hearing aides, etc.
- List of your emergency contacts, doctors, allergies, medications & health conditions, etc. Tip: carry a Wallet Card with this information.

What other things would you specifically need in an emergency?

- _____
- _____
- _____
- _____
